contact@risingtidewebdesign.com
Washington, USA

Full-stack developer and entrepreneur with experience designing, developing, and maintaining custom websites, web applications, and business systems from concept to launch. Skilled at translating business needs into practical technical solutions while managing client relationships, project workflows, and digital operations. Passionate about building software that solves real problems through thoughtful design, modern development, and user-centered experiences.

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Developer | FizzBuzz Web Services (DBA Rising Tide Web Design) (2022–Present)

- Founded and grew a web development business serving small businesses and nonprofit organizations.
- Design and develop custom websites, web applications, and digital tools with modern technologies.
- Manage the complete project lifecycle including discovery, planning, design, development, deployment, hosting, and ongoing support.
- Build custom workflows, CMS integrations, and business automation solutions that reduce manual work.
- Optimize websites for accessibility, SEO, performance, and user experience.
- Manage contracts, client communications, proposals, invoicing, and ongoing support.

Nonprofit Software Developer Intern – Scottish Rite Scholarship Foundation (2022–2023)

- Worked directly with the foundation president to expand and maintain custom software supporting scholarship management, events, scheduling, and organizational communication.
- Developed new features while improving usability and long-term maintainability.
- Assisted with database organization, document management, and administrative workflows.
- Supported technical problem solving across multiple organizational systems.

Self-Published Author & E-Commerce Publisher | Amazon Kindle Direct Publishing (2014 – 2020)

- Provided direct behavioral and developmental support in clinical and educational settings
- Maintained detailed documentation and data collection on client progress
- Followed structured care plans and collaborated with multidisciplinary teams
- Worked with individuals experiencing mental health, trauma, and developmental challenges

Applied Behavior Technician | Various Clinical & Educational Settings | 2014–2016

- Implemented individualized behavioral intervention plans for children with developmental disabilities.
- Collected detailed behavioral data and maintained accurate clinical documentation.
- Collaborated with multidisciplinary teams to support treatment goals.
- Developed strong communication, documentation, and problem-solving skills.

EDUCATION

Software Development Associate Degree | WCC | 2023

Developed a strong foundation in full-stack software development, object-oriented programming, databases, web technologies, and software engineering principles.

Bachelor of Arts – Language, Literacy, and Cultural Studies (TESOL Minor) | WWU | 2014

Studied communication, education, language, and cultural systems, strengthening skills in critical thinking, research, writing, and human-centered problem solving.
